ANNUAL REPORT
OF THE
PARK DEPARTMENT
FOR THE
YEAR ENDING JANUARY 31, 1921.

BOSTON, February 1, 1921.

HON. ANDREW J. PETERS,
Mayor of the City of Boston:

DEAR SIR,— The Park Commission herewith submits its annual report for the year ending January 31, 1921.

The main idea which actuated the commission during the year was to develop, as far as possible with the funds at its command, the unfinished playgrounds throughout the city. The Board is of the opinion that money thus expended will be of much greater benefit to the city than the same amount of money used for the purchase of new areas without the funds to properly equip them for the use of the public.

Following this same line of thought, it may be pointed out that along the line of waterfront at Dorchester Bay there is a large area of undeveloped beach property which is one of the most valuable assets within the limits of any large city in the country. This beach front is within fifteen minutes ride from the heart of the city and greater accommodations should be made immediately for public bathing.

The upkeep of the department has been improving

in character during the last two years, but there is still room for further improvement. Large areas of woodland at Franklin Park, and trees, shrubs and grass areas in other portions of the city need special care on account of former neglect. It is believed, however, that the more efficient work of the present park force will soon make itself felt in the elimination of any existing defects.

Very respectfully yours,

JAMES B. SHEA, *Chairman,*
CHARLES A. COOLIDGE,
JAMES E. McCONNELL,
Commissioners.

REPORT OF DEPUTY COMMISSIONER.

BOSTON, February 1, 1921.

To the Board of Park Commissioners, City of Boston:

DEAR SIRS,— I have the honor to submit herewith a report of the work performed under the direction of your Board for the year 1920. I am pleased to report that the department is in good condition, better than it has been for a number of years. It has a corps of able and disciplined men who work faithfully and intelligently and therefore to the best advantage.

BOSTON COMMON.

A contract was let in the early spring for the restoration of Boston Common after the war activities. The buildings used by war service communities were not vacated until after the 1st of May, but the work of restoration was completed by the 1st of June.

Additional concrete walks were laid across the parade ground.

A contract was let for the development of the area surrounding the Parkman Memorial, providing additional seats for 3,000 people; shade trees were planted and brick walks arranged for according to a new and revised plan prepared by this Board.

Another contract was awarded for the sum of \$55,660 for leveling the ball field and providing fences and back-stops for same, and for permanent walks on Monument Hill, Charles street mall and the main walk on the Common from West street to Charles street, and extending through the Public Garden to Arlington street; this work is about two thirds completed.

A French war tank, presented to the City of Boston by the French Government, was placed in a permanent position on Monument Hill.

PUBLIC GARDEN.

The policy of successive floral displays was continued this year and was enjoyed by thousands of people, particularly the tulip show, which was very radiant in the spring and early summer. A great deal of favorable

comment was made on the design of "carpet bedding" which was enjoyed by every visitor to the Garden. I desire at this time to say a word about the pond in the Public Garden. Its condition has never been satisfactory, although it is thoroughly cleaned at least twice a year. Provisions should be made to have the bottom concreted permanently, thus making it possible to maintain clear water. A new flagstaff was erected on the Boylston street side of the Public Garden.

COMMONWEALTH AVENUE.

The lawns from Massachusetts avenue to Charlesgate West were renovated and some of the English elms replaced. The avenue as a whole is in better condition than it has been for a number of years. On the extension, due to the extensive building of automobile sales-rooms, the avenue has developed into a business section, requiring a number of entrances, thus necessitating the removal of a few of the line trees; arrangements were made to replant where space allows.

FENS.

A contract for bitulithic pavement was let for \$30,000, and all that portion of Boylston street from Richardson Bridge to Peterborough street was resurfaced with a permanent pavement, an improvement which should have been done years ago if funds were available.

A great public improvement was made by the rearrangement of the Westland avenue entrance, made necessary by the large amount of auto traffic and consequent danger existing at this point. This improvement is one for which the department has received much praise from the public and at the same time is a distinct advantage to the Fens from the landscape and artistic point of view. The total cost of this was about \$20,000.

The Robert Burns statue was dedicated early in the year and the walks and planting spaces around it were arranged in conformity.

Considerable thinning out of the shrubbery borders has been done and all the roads were sanded and oiled.

JAMAICAWAY.

This portion of the road from the Riverway to Willow Pond road has been resurfaced with bitulithic at an expense of \$30,000.

The Arnold Arboretum roads were all repaired, tarred and sanded, the walks recut, covered with stone dust and rolled.

The thinning out of all undesirable shrubs started last year was continued during the winter.

FRANKLIN PARK.

The Refectory Building was renovated and improvements made for golfers at a total expense of about \$15,000.

The golf links were reseeded, being used for the first time this year since the ground was broken up for war gardens. It was impossible to permit of golfing until the turf on the greens became firm enough for play. In the Children's Playstead, used for the same purpose, the ground has been regraded and seeded.

A contract for the lion house was let at an expense of \$60,000 and the animals were removed and the building opened to the public on the 1st of January.

Other improvements have been made in the Zoo, including the extension of deer ranges and the continuation of the walks through the Greeting.

A new water and sewer system to the lion house was installed at an expense of about \$8,000.

ROSLINDALE.

A contract was made for the development of the Irving W. Adams Park, at an estimated cost of \$20,000. This work is practically completed with the exception of the planting and the laying of granolithic walks, which must be deferred until spring.

CHARLESTOWN.

The old locker building at the Charlestown Playground, furnishing only toilet facilities for those using the playground, was enlarged, giving ample facilities for showers and lockers for those using the grounds. The ball fields were regarded and improved, the fence rebuilt and bleachers put in at the baseball diamond. The total cost of these improvements amounted to \$20,000.

The Charlestown Heights shelter building for the children, out of repair for a number of years, has been thoroughly renovated and repaired and a new metal roof added, at a cost of \$4,000.

At Dewey Beach Bath House the old metal lockers complained of were replaced with wood and a boys' department added; the ventilating and lighting systems were improved at a total cost of \$3,500.

The improvements on the Mystic Playground, arranged for some time ago, were completed; the ball field was enlarged and fences placed around the children's playground to protect them from the older boys.

At Winthrop Square the entire area, which was remodeled last year, has been seeded and planted with trees.

NORTH END PARK.

The playground area was entirely resurfaced and new fences were erected to separate the men's and women's bathing beaches; extensive repairs were made at the men's pier.

EAST BOSTON.

At Wood Island Park the bathing facilities were extended by the addition of lockers for men and women; the surface of the ball field was regraded; about 600 feet of permanent seats were placed around the ball field. The gymnasium was improved, the old apparatus being removed; the tennis courts were inclosed with a new fence; three new wire backstops were erected on the ball diamonds.

The Saratoga Street Playground was completed, the surface being leveled; the children's shelter building was opened for use with suitable playground apparatus; tree pits were put in for the new trees.

At Eagle Hill the old reservoir has been filled in and the surrounding grounds leveled off for the new playground surface; the field house is nearly completed and will be ready for the coming season. The cost of these improvements was \$77,000.

SOUTH BOSTON.

The baths at the Headhouse, destroyed by fire the preceding year, were temporarily repaired and the bathing facilities were for the first time in charge of the employees of this department, to the better satisfaction of the bathers. A contract was let in September for the new bath house and for the renovation of the Headhouse itself, to make it more suitable for refreshment purposes. The cost of the above improvements will amount to approximately \$140,000.

New permanent seats were added along the entire waterfront.

A temporary shelter for women bathers was erected at the Dorchester end of the Strandway Beach.

At Thomas Park a new iron fence was erected.

The L Street baths were repainted and the handball court was rebuilt; extensive repairs were made on the fences around the bathing beaches partially destroyed by the winter storms.

The lawns bordering the beach and the loam spaces between the traffic road and the parkway were remodeled, old shrubs removed and the ground regraded and seeded.

DORCHESTER.

McConnell Park was improved by planting trees, loaming the slopes about the ball field and regrading the surface of the ball field and providing additional drainage.

Gibson Street Playground — new backstops were erected on the ball field; 200 feet of permanent seats were added for the spectators, and the triangular plot of ground between Geneva avenue, Park street and Dorchester avenue was regraded. The department obtained over 10,000 cubic yards of good, clean material without any expense to the city.

Tenean Beach — the slope of the beach was regraded and sanded, and a new approach to the bath house from the street was provided.

Ronan Park — a new wire fence was built dividing the property lines and to prevent the crossing through private estates.

Edward Everett and Richardson squares were remodeled according to plans designed years ago at the urgent request of autoists and other interested parties, in order to provide greater safety for auto, team and pedestrian traffic, at an expense of \$3,000.

The Blake House was repaired and a wire fence erected around it.

JAMAICA PLAIN.

A contract was let for the enlargement of the playground on Carolina avenue; an additional area of $1\frac{1}{10}$ acres has been purchased and the ground leveled off for a baseball field; the amount appropriated for the purchase of land and construction was \$56,000. As the land

damages have not yet been settled by the Law Department, it is impossible to say at the present time how much more work can be carried on, but there is evidently sufficient funds to erect the needed fences and backstops.

The shelter and retaining wall at the Mozart Street Playground have been completed and the ground leveled off for a children's playground; tree pits have been arranged and trees planted during the fall. This development was made at a cost of \$25,000.

ROXBURY.

At the John Winthrop Playground a new 18-foot wire fence was erected at the end of the ball field to protect the owners of adjoining property from damage by baseball playing.

At Mission Hill Playground the ball field was enlarged, and wire fences were erected around the ball field and the playground to protect adjoining property owners, at an expense of \$6,200.

BRIGHTON.

At Portsmouth Street Playground the new locker building was completed and opened to the public, the expense of this building being about \$18,000.

At the Allston Playground the improvements included the building of a fence about the recently graded ball field and a contract was let for the erection of a locker building for the use of the children. The total cost for this improvement was \$26,000. The building has not yet been completed.

RANDOLPH STREET PLAYGROUND.

Improvements were made on the buildings, fences and grounds, at an expense of \$6,000.

Permanent concrete benches were erected at the following parks and playgrounds: Orchard Park, Marcella Street Playground, Strandway, Randolph Street Playground, Roslindale Playground and Boston Common.

CEMETERY DIVISION.

The fence contracted for at Mount Hope Cemetery, to inclose a large portion of the cemetery bordering on

Paine street from private property, is very nearly completed, at an expense of \$20,040.

I respectfully recommend to the Board the following improvements during the coming year:

BOSTON COMMON.

The concreting of the Frog Pond and the laying of permanent walks in the neighborhood; the relaying of granolithic walks on Tremont street and Boylston street, on account of the recent widening made by the Street Commissioners; the rearrangement of the lighting system on the Common, including a new cable for the use of public celebrations at the Frog Pond.

FENS.

The Fens, now in an unfinished state, should be graded, loamed and planted, and the future plans of the commission for the Fens development carried out.

A permanent road surface should be laid on the parkway from Willow Pond road to Franklin Park and on the Strandway from Edward Everett square to Old Colony avenue.

New greenhouses are to be built at Franklin Park; \$60,000 has been provided from the income of the Parkman Fund.

The area along the Strandway in South Boston known as Columbus Park should be developed and a suitable bath house erected. This would make an ideal place for driving and bathing.

The new playground located on Adams street in Dorchester should be graded and arranged for ball playing and a children's playground provided.

A new sanitary building should be erected at Marine Park, as the public sanitariums have been removed from the Headhouse building now being remodeled. The department has at the present time a sum of money appropriated which is insufficient to complete this improvement.

The ball field at Christopher Gibson Playground should be leveled and fences erected, both around the ball field and the children's playground. A new shelter and locker building should be erected on the triangle known as John A. Doherty Playground.

The Neponset Playground has been in possession of the department for a long number of years, but has never proved satisfactory; the playground should be filled with light material, such as ashes from house collections. I respectfully recommend that this be carried out during the ensuing winter.

Smith's Pond, the only playground in Hyde Park, needs a shelter and locker building, also playground apparatus. I respectfully recommend that \$25,000 be requested for this purpose.

The year 1920 has been a very successful one for the Zoo and Aquarium. Over two million people visited the Zoo during the year. There has been a substantial increase in the number of exhibits and the losses have been very small.

MOTH AND TREE DIVISION.

During the year 195 trees were removed from the streets of the city, and 457 trees were trimmed on account of growing too near or overhanging residences, or due to the ravages of the leopard borer. Pruning was done in the various sections of the city, and a systematic planting in certain areas has been carried on as in previous years. Special attention was given to the trees on Boston Common and the Public Garden.

Over 42,000 private estates were inspected, of which 20,224 were reported infested with gypsy moth nests, and 17,313 of these places, as well as all trees belonging to the city, were cleaned or sprayed by the moth force during the year.

A very small colony of brown tail nests was found in Brighton and destroyed.

The satin moth was found in a few places for the first time; a careful investigation was made and the places sprayed during the summer months.

The oriental moth has again made its appearance in the Dorchester, Roxbury, and South Boston districts, and will be cared for during the ensuing year.

GYMNASIA.

The attendance at our gymnasias and baths during the year 1920 was very gratifying, the grade of the work undertaken having been on a higher plane and more far

reaching than ever before, despite the fact that the occupancy of the buildings by the State Guard interfered with the classes in five different places, due to the police strike. It was necessary to completely renovate the buildings at an approximate cost of \$10,000. Even with these adverse conditions the attendance shows a gain and an assured tendency to come back to original conditions.

The Cabot Street Pool ranks among the highest, a test of the water being taken weekly by the Board of Health, and the report shows that at the present time Cabot Street is one of the most sanitary pools in the country.

This division of the department at the present time has one of the best corps of physical instructors in the country.

BATHS AND BEACHES.

During the year 1920 a temporary wooden structure containing lockers and showers was built on Carson Beach, part of the Strandway, for the use of women and children.

L Street was completely renovated, the outside of the building being painted, additional lockers provided and the beach regraded.

The Headhouse Bath House, destroyed by fire, was rebuilt and opened to the public on June 15.

Wood Island Beach was sanded and additional lockers provided in the bath house, which will accommodate 400 additional bathers.

North End Beach — additional lockers were provided for women and children; a new division fence was erected, dividing the men and women; concrete steps built on the women's side.

Dewey Beach — the old lockers in the boys' department were taken out and new ones erected; the boys were separated from the men, a much needed improvement.

Freeport Street Beach was sanded and rafts provided.

Tenean Beach was regraded and sanded and is now one of the most popular bathing resorts in the department.

The floating houses located in the Charles River Basin, Meridian Street Bridge, etc., were very popular during the bathing season.

The Dover Street Bath House, the first indoor bath house built in Boston, still continues to be the most popular in the city.

The work of the lifesavers this year merits special approbation, not a single life being lost on any of the beaches.

Respectfully submitted,

W. P. LONG,
Deputy Commissioner.

REPORT OF THE CURATOR OF THE ZOOLOGICAL GARDEN AND AQUARIUM.

BOSTON, January 31, 1921.

TO WILLIAM P. LONG,
Deputy Commissioner:

DEAR SIR,— I herewith submit the following report of the Zoological Garden and Aquarium for the year ending January 31, 1921.

ZOOLOGICAL GARDEN.

The year of 1920 in the Zoological Garden has been a very successful one, due to the confidence you have placed in me, and your ever ready help is greatly responsible for the successful maintenance and progress accomplished during the year.

Attendance.

It is safe to estimate that fully two million people visited the Zoological Garden during the past year.

On fair Sundays and holidays, through the spring, summer and fall, the capacities of our buildings were taxed to the utmost, and we were often hard put to keep the crowds moving in order that none should be denied the opportunity of viewing the exhibits.

Exhibits.

Although but approximately \$1,300 was spent for exhibits during 1920, yet it is with considerable satisfaction that I am able to report that there has been a substantial increase in the number of species and specimens of both mammals and birds. This is accounted for largely by the record-breaking number of donations and by the capture of thirty-five birds comprising fifteen different species, by myself, in the park.

The most important acquisitions were a beautiful pair of leopards, one male wallaroo, one Diana monkey, one pair of Bower birds, one pair of scarlet ibis and a couviers toucon.

The birth of three deer has added to the number of hoofed exhibits.

Our losses have been comparatively small, the most felt ones being the camel which died last spring of acute gastro enteritis, the cub lion one and one half years old, which had to be killed on account of its being in the last stages of tuberculosis, and one eagle as the result of an ulcer on the head. Three raccoons and one deer were killed at night time by vandals and dogs. This sort of thing we will always have to put up with until a man and dogproof fence entirely surrounds our grounds.

New Lion House.

The most important development during the year was the building of a new lion house which was erected beside the Greeting, to the eastward of the elephant house.

This building has seven large, light and well ventilated cages, the fronts of which are made of heavy wire mesh instead of the customary bars, thus eliminating the prison effect. The sanitation is of the best and many innovations made to facilitate the handling and care of the animals.

It was great satisfaction to get the animals from their old, dark and poorly ventilated quarters at the round house to this modern building.

Work has been started on the building of outside cages, where on good days the animals will be able to get plenty of fresh air and exercise.

The present house only cares for the members of the cat family which we had in hand, but is it hoped that some time soon an addition of five more cages will be made, in order that we may exhibit tigers, jaguars and other members of this interesting family.

Protection.

I cannot impress too deeply the great need of a dog and man proof fence in order to give us proper protection.

Until the "Police Strike" there were two Zoo employees and one policeman to patrol and guard the vast area of our Garden at night.

Franklin Park is a favorite gathering ground in the evening, for "gangs" of youths on mischief bent. Often their pranks take the form of cruelty and vandalism.

Although prohibited by city ordinance, dogs of all kinds continually make the park their hunting ground.

During the past year one deer, two raccoons, one

kangaroo and several birds have been beaten to death with sticks and stones, or stolen, by vandals. Two deer, one raccoon and several birds have been killed and many exhibits severely injured by dogs.

In naming some of the chief requirements in the establishment of a zoological garden, that noted authority, Dr. William T. Hornaday of New York, mentions "a dog and man proof fence."

Future Needs.

It is obvious that in an institution of this kind, which may justly be termed to be in its infancy, the needs to make it complete are manifold, and under the present conditions cannot be accomplished in one or even several years. Still, by gradually adding the most necessary installations each year as we can afford them, we may reach that greater state of perfection with perhaps a firmer grip, in the way of more successful management induced by our being able to grow gradually with the Garden.

The most necessary installations for the coming year are a pheasant aviary and cages for hawks, vultures and eagles. If properly housed the pheasants make a beautiful and comparatively inexpensive exhibit. At present they are in entirely inadequate quarters in the flying cage.

The need of proper cages for raptorial birds is very great, if we are to exhibit them at all. The mortality among those we have has been very large and due to their improper quarters.

One of the first questions asked by a stranger in a zoological garden is, "Where is the reptile house?" Without question such a building would be a very valuable acquisition.

I think there is no question but that the round house is not a proper place to keep animals for exhibition and that when a house is provided for the primates it may very well be closed.

AQUARIUM.

Nineteen hundred and twenty completed the ninth year in the history of the Aquarium. Although many plans and needs, which would have greatly heightened the standard of our institution, had to be foregone, yet it cannot be denied that the past year was a remarkably

good one, especially in regard to labor, the upkeep of the plant and the educational value of a largely increased number of exhibits.

Exhibits.

During the year we have shown at the Aquarium 125 different varieties of mammals, fishes, reptiles and invertebrates. Of these, 39 varieties were on exhibition at the beginning of the year, and 89 varieties are being shown at the present time. We started the year with 300 specimens of fishes, representing 28 varieties. At the present time there are 477 specimens on exhibition, representing 48 varieties.

Water.

Considerable trouble was experienced this year with gas disease among the marine fishes. Chemical analysis and experiments showed the trouble to be due to excess air in the water caused by leaks in the worn-out piping. In August the salt water in the big storage tank was replenished by 160,000 gallons brought from down the harbor by water boat. This quantity was needed to replace the losses by leakage and evaporation.

Piping.

The salt water piping system is built of lead-lined iron pipe. The action of the water has worn through the lead in many places and is eating the iron. This fact is evidenced by the ever-increasing quantity of rust in the water. It is impossible to properly repair it, as the pipe crumbles when gripped with a wrench. Hard rubber or solid lead pipe, although the first cost is high, would more than pay in the end as they last four times as long and will keep the water pure.

Collections.

Early in October, in conjunction with staff members of the New York and Philadelphia Aquariums, a collecting trip was made to Key West, Florida. While the fish were being held in Key West Harbor, an accident to an oil tank on the shore killed over half of them and greatly weakened the others. Some were lost on the way up north when the steamboat encountered severe storms, so that our receipts from this venture were not as large as we hoped for. However, the trip added to some extent to our exhibit of tropical marine fishes.

New Addition.

Although the Boston Aquarium is situated in the "Queen Fishing City" of the country, it has none of the famous food fishes in its tanks. Owing to the fact that our salt water is heated it is impossible to keep cod, haddock and other equally well known food fishes. These fishes require refrigerated salt water and such a system can only be taken care of by building an addition to the Aquarium. Until such addition is provided the the Boston Aquarium cannot hope to compare with other Aquariums in this respect.

Hatchery.

Essentially an educational institution, the Boston Aquarium still lacks one of the most interesting and instructive of all piscatorial exhibits, a fish hatchery. The installation of a battery of McDonald hatching jars would prove both instructive to the visitors and helpful in increasing the number of fishes in the tanks.

Harbor Water.

More or less trouble has been experienced recently with fungus on the fresh water fishes. An attempt has been made to treat this disease with both salt and permanganate. Good results, however, will not be obtained until arrangements are made whereby a steady flow of natural salt water can be introduced into the tanks. This necessitates a pipe line direct to the harbor and a pump large enough to deliver a good, steady supply at all times. Owing to the fact that the State of Massachusetts recently filled in the channel between Marine Park and Castle Island, the water in Pleasure Bay is no longer fit to use in the Aquarium. In order to secure a proper supply of water, it will have to be brought by pipe line from the easterly end of Castle Island. It seems proper, under the circumstances, that the state authorities should be asked to assume part of the expense of such a pipe line.

Respectfully submitted,

G. F. MORSE, JR.,
Curator.

REPORT OF COMMITTEE ON BAND CONCERTS.

BOSTON, November 23, 1920.

HON. ANDREW J. PETERS,
Mayor of Boston:

DEAR SIR,—In behalf of the committee appointed by your Honor to make recommendations to the Park Department regarding summer band concerts, I beg herewith to tender a report of the past season.

The generous increase in the appropriation over that of last year, placed at our committee's disposal by your Honor, made possible the extension of its policy of supplementing the Sunday afternoon concerts in certain largely attended public parks by a season of six weeks on Boston Common, during which two concerts daily (except Mondays) were given. This season could have been still further prolonged had it not been for the increase in the scale of the musicians' prices over that of last year; amounting to 20 per cent for the Sunday concerts, and nearly 10 per cent for the more numerous concerts on Boston Common.

With regard to the concerts other than those on Boston Common, the committee, after due deliberation, unanimously decided to adhere to the policy adopted two years ago. This policy provided for the centralization of these concerts in certain localities, and for giving them only on Sunday afternoons, in preference to a wider distribution at divers places and times with the resulting loss in their merit and musical and recreative value. The committee was thus unable to recommend favorable action upon requests occasionally referred to it, to provide concerts or groups of concerts in various districts. The committee believes that if such concerts were to be impartially and generally assigned, there would inevitably result a marked decrease in the musical standard now assured by the policy of centralization. This belief is amply confirmed by past experience.

A schedule of the concerts is appended herewith, together with a statement of expenditures under the appropriation.

For the Sunday afternoon concerts on Boston Common the band again numbered forty men, including the conductor; for those at Marine and Wood Island Parks and at Jamaica Pond, thirty men; for all other concerts, excepting that of September 12 on Boston Common, twenty-six men, always including the conductor. The concert on Sunday evening, September 12, on Boston Common, above referred to, was not originally included in the schedule, but was made possible by the unexpended balance of a portion of the appropriation which the committee set aside at the beginning of the season for possible special contingencies, and through the further co-operation of the chairman of the Park Department. For this concert the band numbered fifty-five men. This number afforded an opportunity to choose a program of special merit and to employ an instrumentation comparable to that of the best concert bands of the country, and to the standard recently adopted by the United States War Department for the more important army bands.

For all concerts the committee endeavored, generally with gratifying results, to maintain the high standard of repertoire to which it believes the public is entitled, and of which the public has constantly shown its hearty appreciation. Experience, however, has demonstrated more and more that the most artistic results are dependent not alone upon excellence of personnel, and still more upon quality of leadership, but upon opportunity for regular and frequent performances under that same leadership. Although but for a comparatively limited period, this opportunity is afforded by the daily concerts on Boston Common, although the number of men engaged is smaller than that for most of the Sunday concerts. Up to the present time, however, here as well as elsewhere, results have been affected by two factors; one, the character of the instrumentation of much of the published repertoire, unless especially rearranged for the particular combination of instruments available; and secondly, but of still more importance as regards the performance of new works of interest, or of older ones of material difficulty, the fact that the rules governing the musicians' services provide

for no rehearsals unless they are paid for in addition to the price paid for the concerts. This condition attaches even to such a season as the one extending six weeks on Boston Common, when any rehearsal whatever, if held and unless paid for in addition to the concerts, must be by voluntary action of the musicians themselves. If this action is not unanimous, the benefit of such voluntary rehearsals is obviously lessened. The committee urges consideration of this question as one of the most vital matters to be taken up with regard to future seasons.

The public has again given evidence of its interest in the music provided by the large attendance at practically all the concerts, and by its attentive attitude and discriminating applause. Particularly gratifying in these respects were the week-day evening concerts on Boston Common, which drew large numbers of auditors from outlying districts, as well as from the more congested sections of the North and West Ends.

Since the close of the season the Park Department has arranged for the eventual improvement of the shade conditions and for a large increase in the seating accommodations around the Parkman Bandstand, in accordance with Mr. Shurtleff's plans, which were carefully considered and heartily endorsed by the committee. The committee recommends that the matter of a permanent and efficient lighting system for this bandstand be given consideration at as early a date as possible.

While the generosity of the appropriation placed at the disposal of the committee this year is fully appreciated, it urges the desirability of still further extending the season of daily concerts on Boston Common next year to the total of not less than eight weeks, without reducing the number of concerts given elsewhere.

At the beginning of the season Mr. Charles K. North, whose services upon the committee had been most valuable and helpful, was obliged to tender his resignation on account of taking up his residence out of the state. Mr. William C. Mackinlay accepted the invitation extended by your Honor to take Mr. North's place on the committee.

The committee desires to place upon record its deep appreciation of the courtesy with which the chairman of the Park Department and his assistant received its recommendations, and assured their realization. It

desires also to express its recognition of the public-spirited co-operation of the daily Press in making announcement of the various concerts and programs.

Respectfully submitted,

WALLACE GOODRICH, *Chairman.*
 ARCHIBALD T. DAVISON.
 MALCOLM LANG.

The burying grounds, cemeteries and tombs which are owned by and in charge of the City of Boston are as follows, with a total area of about 7,040,708 square feet.

EAST BOSTON.

Ward 1.

Square Feet.

<i>Bennington Street</i>	157,500
------------------------------------	---------

Ward 2.

<i>Rainsford Island</i>	43,560
-----------------------------------	--------

CHARLESTOWN.

Ward 3.

<i>Bunker Hill</i>	48,202
<i>Phipps Street</i>	76,740

CITY PROPER.

Ward 5.

<i>Copp's Hill, Hull street</i>	89,015
<i>King's Chapel, Tremont street</i>	19,344
<i>Granary, Tremont street</i>	82,063

Ward 6.

	Square Feet.
<i>South End South, Washington street</i>	64,570

Ward 8.

<i>Central, Common</i>	60,693
----------------------------------	--------

SOUTH BOSTON.

Ward 10.

<i>Hawes, Emerson street</i>	11,232
--	--------

DORCHESTER.

Ward 11.

<i>North, Upham's Corner</i>	142,587
--	---------

ROXBURY.

Ward 12.

<i>Eliot, Eusuis street</i>	34,830
<i>Warren, Kearsarge avenue</i>	54,500

DORCHESTER.

Ward 21.

<i>South, Dorchester avenue</i>	95,462
---	--------

WEST ROXBURY.

Ward 23.

<i>Westerly, Centre street</i>	39,450
<i>Walter Street</i>	35,100

Ward 24.

Mount Hope, Walk Hill street, 117 acres and 36,536 square feet. Opposite Mount Hope are two lots of unused land on Berry street, north corner Manning street, 7,150 square feet, and Berry street, south corner Manning street, 5,262 square feet.

HYDE PARK.

Ward 24.

Fairview Cemetery, Fairview avenue, about fifty acres.

BRIGHTON.

Ward 26.

Evergreen, Commonwealth avenue, 604,520 square feet.
Market Street, 18,072 square feet.
